New Course Available for Juniors and Seniors!

Engineering Innovation 92688  EEL 4990  UDIC
Mondays 2 - 4:50 pm

Engineering Innovation introduces students to the concepts and practices of technology innovative thinking and entrepreneurship.

Learn how to rapidly develop and test ideas by gathering massive amounts of customer and marketplace feedback.

Use business plans and case studies to enhance life skills in entrepreneurial thought and action that you can utilize in starting technology companies or executing projects in large companies.

This course will count as a concentration elective for EE and CpE.
